

PROGRAMME

The Launch of the GEODE Green Gas Report

19 April 2016, 12h00-14h00

Room ASP 3H-1, European Parliament
Brussels

BACKGROUND

Over the last 30 years, the energy landscape has undergone significant change. New alternative energy sources have emerged as Europe responds to the ongoing climate and economic challenges with the overall aim of realising a low carbon economy.

Gas remains a key part of the EU's energy mix and this event aims to highlight not only its importance today, and to 2020, but also the role gas and the gas distribution networks should play out to 2050 and beyond.

Our event highlights the 'energy renaissance' gas is undergoing, as Green Gas increasingly becomes part of the energy mix.

AGENDA

11:30 All non-pass holders to meet outside the Altiero Spinelli building entrance to be signed in to Parliament*

12:00 Registration & Networking Lunch

12:20 Welcome & Opening Remarks by **Tony Glover**, ENA/GEODE
The role of gas in the EU's future energy mix
