

***EV Charging.
is there a
Business Case?***

- 150 km autonomy
- 1,36€ /100km when charging at home
- Free charge in some public places

Cost

only occasional pay-for-charge
in public places

ROI impossible to calculate

..EV is a must

Generation will grow distributed

EV charging should also grow distributed

if EV's are a must for sustainability

.....and a tool for flexibility

EV charging stations should be
a DSO asset, under a grid tariff
scheme

.....operated by retailers

90 employees

56.000 customers

2 European Projects

Smart Rural Grid

Naiades
