

GEODE Priorities 2024

It's time for Action for the Grids

Financing
the Grids
with fit for purpose
DSO revenue
regulation

Implementation Electricity Market Design Reform

Implementation of EC's Action Plan on Grids

Implementation of Renewable Gases & H2 markets package

Development of distributed flexibility

Grid Planning & Anticipatory Investments

Digitalisation

Empowering of the Consumer's role

Permitting & Public acceptance

Implementing
new task for
DSOs in the
decarbonisation
transition

Supporting the Green Transition - 2040 Climate Targets & CO2 strategy

GEODE Actions 2024

Investments - Dialogues with NRAs and investors, sharing best practices

Revenue Regulation - Sharing best practices among members – balance approach towards CAPEX & OPEX, contributing to definition of anticipatory investments, publication of GEODE paper on Revenue Regulation (Spring 2024)

Grid planning – cooperation between DSOs and TSOs, across sectors, sharing best practices, dedicated webinar

Digitalisation of Distribution grid – sharing best practices, roundtables within the GEODE WG Innovation & Development

Distributed Flexibility – contributing to Network Code Demand Response, monitoring development flexibility markets, roundtables within GEODE WG

Permitting process & Public acceptance – active participation EC Pact of Engagement, dialogue with NRAs, public engagement with consumers and stakeholders

Repurposing of existing gas grids infrastructure to accommodate renewable fuels, and move towards CO2 transportation – by promoting best practices exchanges, roundtables discussions within WG and GEODE Events
