GEODE Spring Seminar 2025

May 2025

The nexus of forces shaping our business landscape

DIGITAL MATURITY

8x

profit growth experienced by digitally mature companies relative to those less digitally advanced

[BCG Global](#)

INFRASTRUCTURE

3x

increase in expected power needs of US data centers between 2024 and 2030

[McKinsey & Company](#)

GLOBALIZATION

72%

global businesses reported plans to expand into new cities, countries, or regions

[Equinix 2023 Global Tech Trends Survey](#)

CLOUD STRATEGY

50%

Nearly half of cloud buyers overspent in 2023, with 59% expecting overruns in 2024

[IDC 2024](#)

AI ADOPTION

30%

Y/Y increase in companies who have integrated AI into at least one business function

[McKinsey Global AI Survey 2024](#)

BARRIERS TO INNOVATION

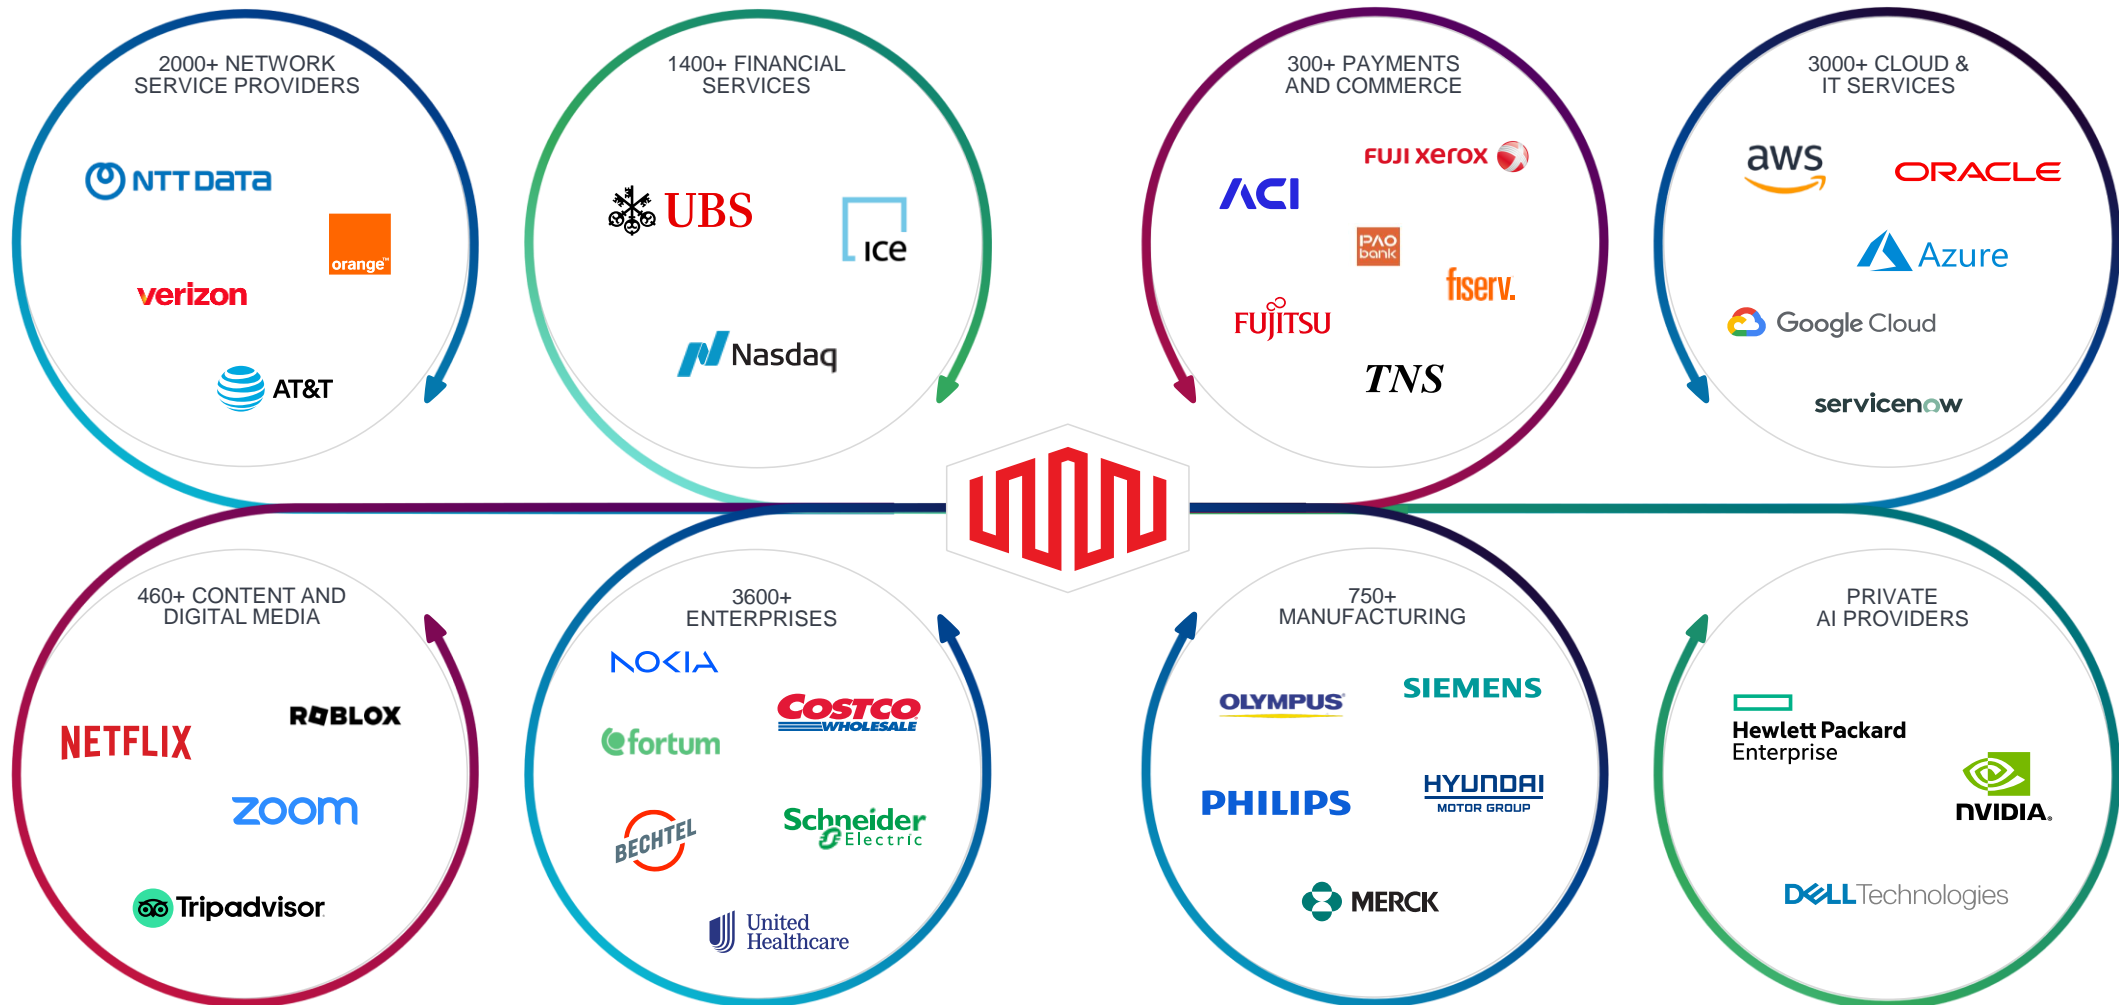

Up to **30%**

of organizations may reconsider AI investments based on lack of talent, budget, and IT readiness

[IDC 2025 FutureScapes: Worldwide IT Industry Predictions](#)

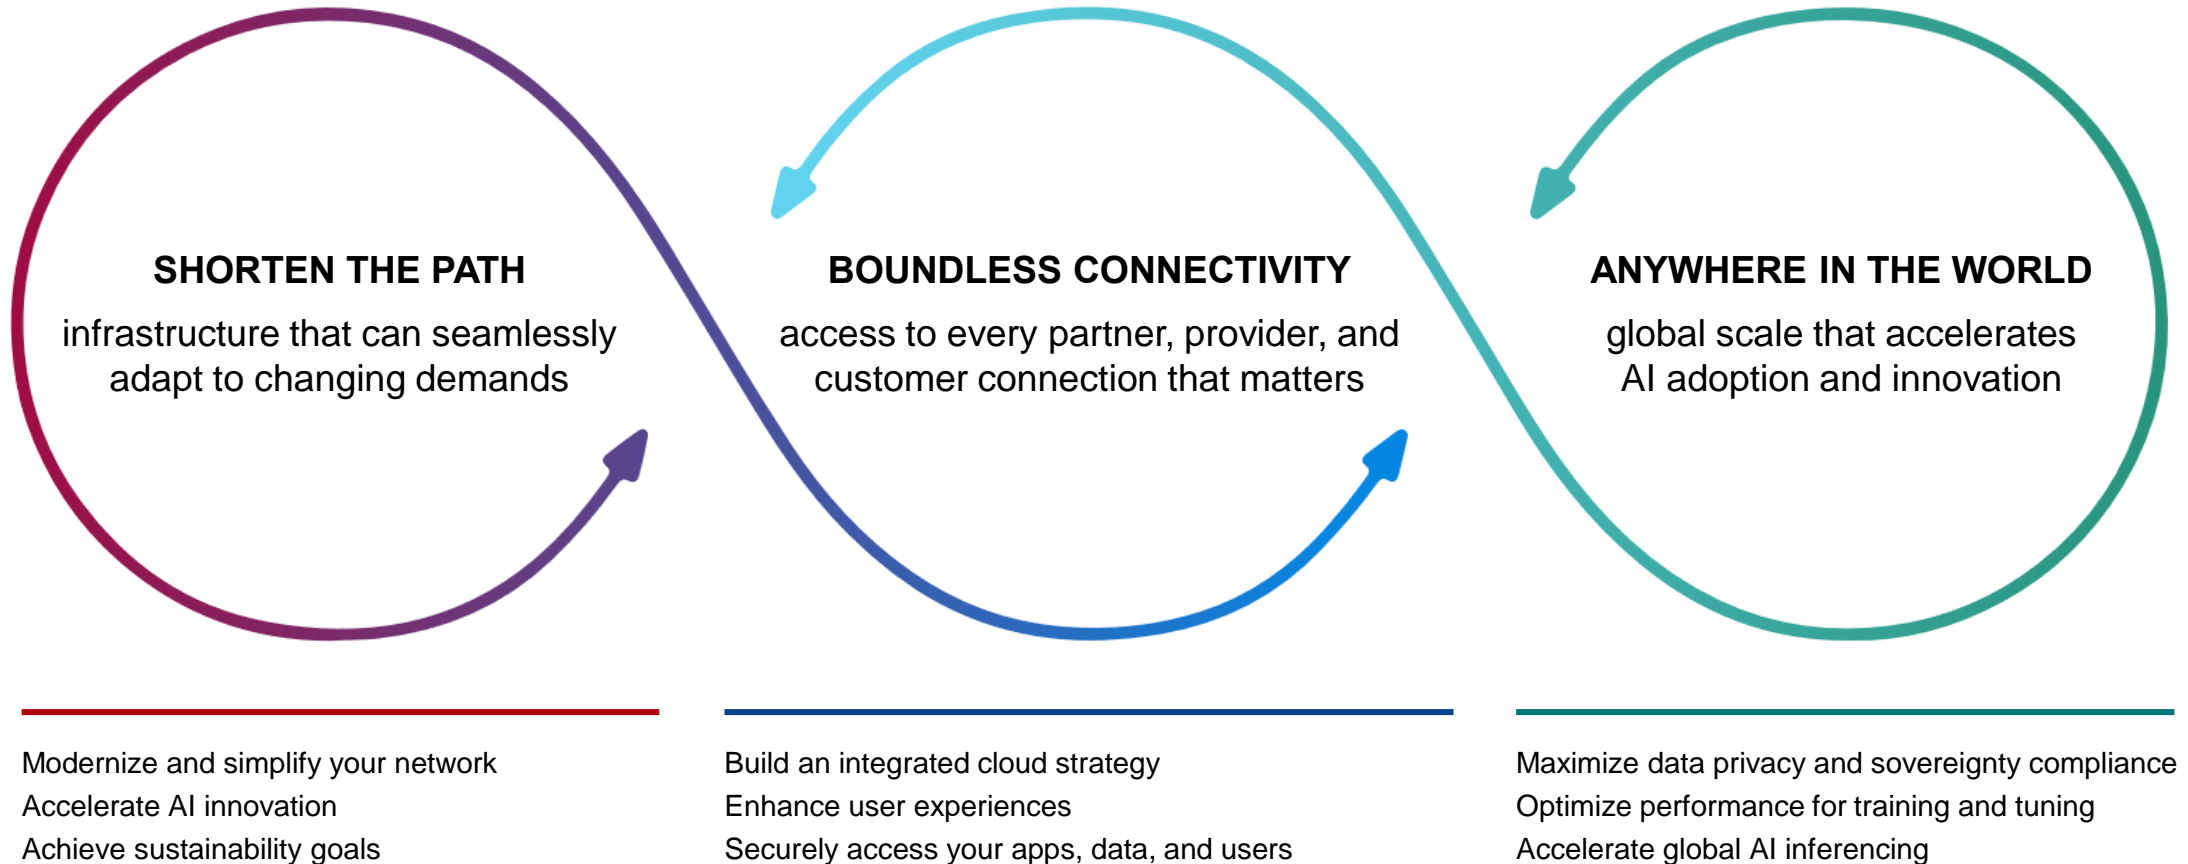

Interconnecting industries, ecosystems and partners for 26+ years

Powering customer impact today, and building for tomorrow

How we can help

Shorten the path

Infrastructure that can seamlessly adapt to changing demands

Localize traffic

Maximize application performance and business continuity with low latency

Modernize and simplify your network

Direct interconnection to a robust ecosystem of key business partners and cloud providers

Accelerate AI innovation

AI-ready data centers optimized for training, fine-tuning, and inferencing

Achieve sustainability goals

Advanced cooling and secure power delivered through 96% renewable energy coverage

Architected critical IT systems infrastructure to keep passengers, partners, and governments connected around the world.

Scaled IT infrastructure for a global train manufacturer to achieve a 10X year-over-year performance gain.

Supported AI workloads to enhance early disease detection and support more efficient clinical procedures.

Reduced the overall carbon footprint of Schneider's digital infrastructure by shifting to infrastructure-as-a-service capabilities.

Boundless connectivity

Access to every partner, provider, and customer connection that matters

Build an integrated cloud strategy

Reduced multicloud complexity with on-demand scalability and lower costs

reducing complexity and cost

Enabled a cloud storage provider to deliver low-cost, high-performance cloud storage, providing seamless access to data for research, disaster recovery, and media production.

Enhance user experiences

Seamless interconnection across our ecosystem and diverse cloud providers

498K physical cross-connects and
40%
of the world's public cloud connections

Leveraged a modernized distributed architecture to speed up approvals and grant over 30% of SME customers their first-ever bank loans.

Securely access your apps, data, and users

Improved data security and compliance through private connections and simplified hybrid multicloud infrastructure

Safeguard data and build trust with advanced security

Adopted a hybrid multi-cloud architecture to ensure reliable, secure access to travel reservations, logistics and maintenance systems for employees and customers.

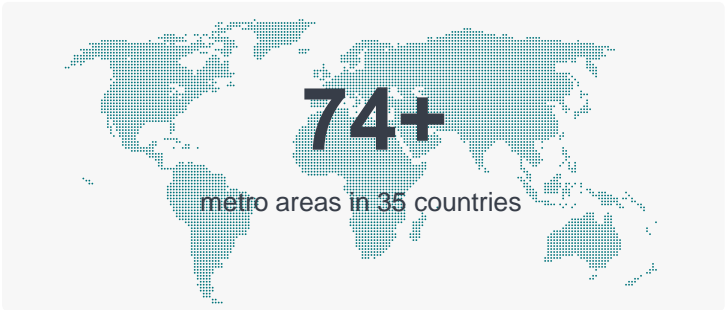

Anywhere in the world

Global scale that accelerates AI adoption and innovation

Maximize data privacy and sovereignty compliance

Seamless data privacy and sovereignty compliance across all your deployments

Increased speed and accuracy of medical diagnoses by decreasing AI training time from months to days—while maintaining security, a top business priority.

Optimize performance for training and tuning

Create a high-performance environment for AI training and fine-tuning

Cut AI training time by 70% to advance autonomous vehicle intelligence and progress their ambition of eliminating deaths by traffic accidents.

Accelerate global AI inferencing

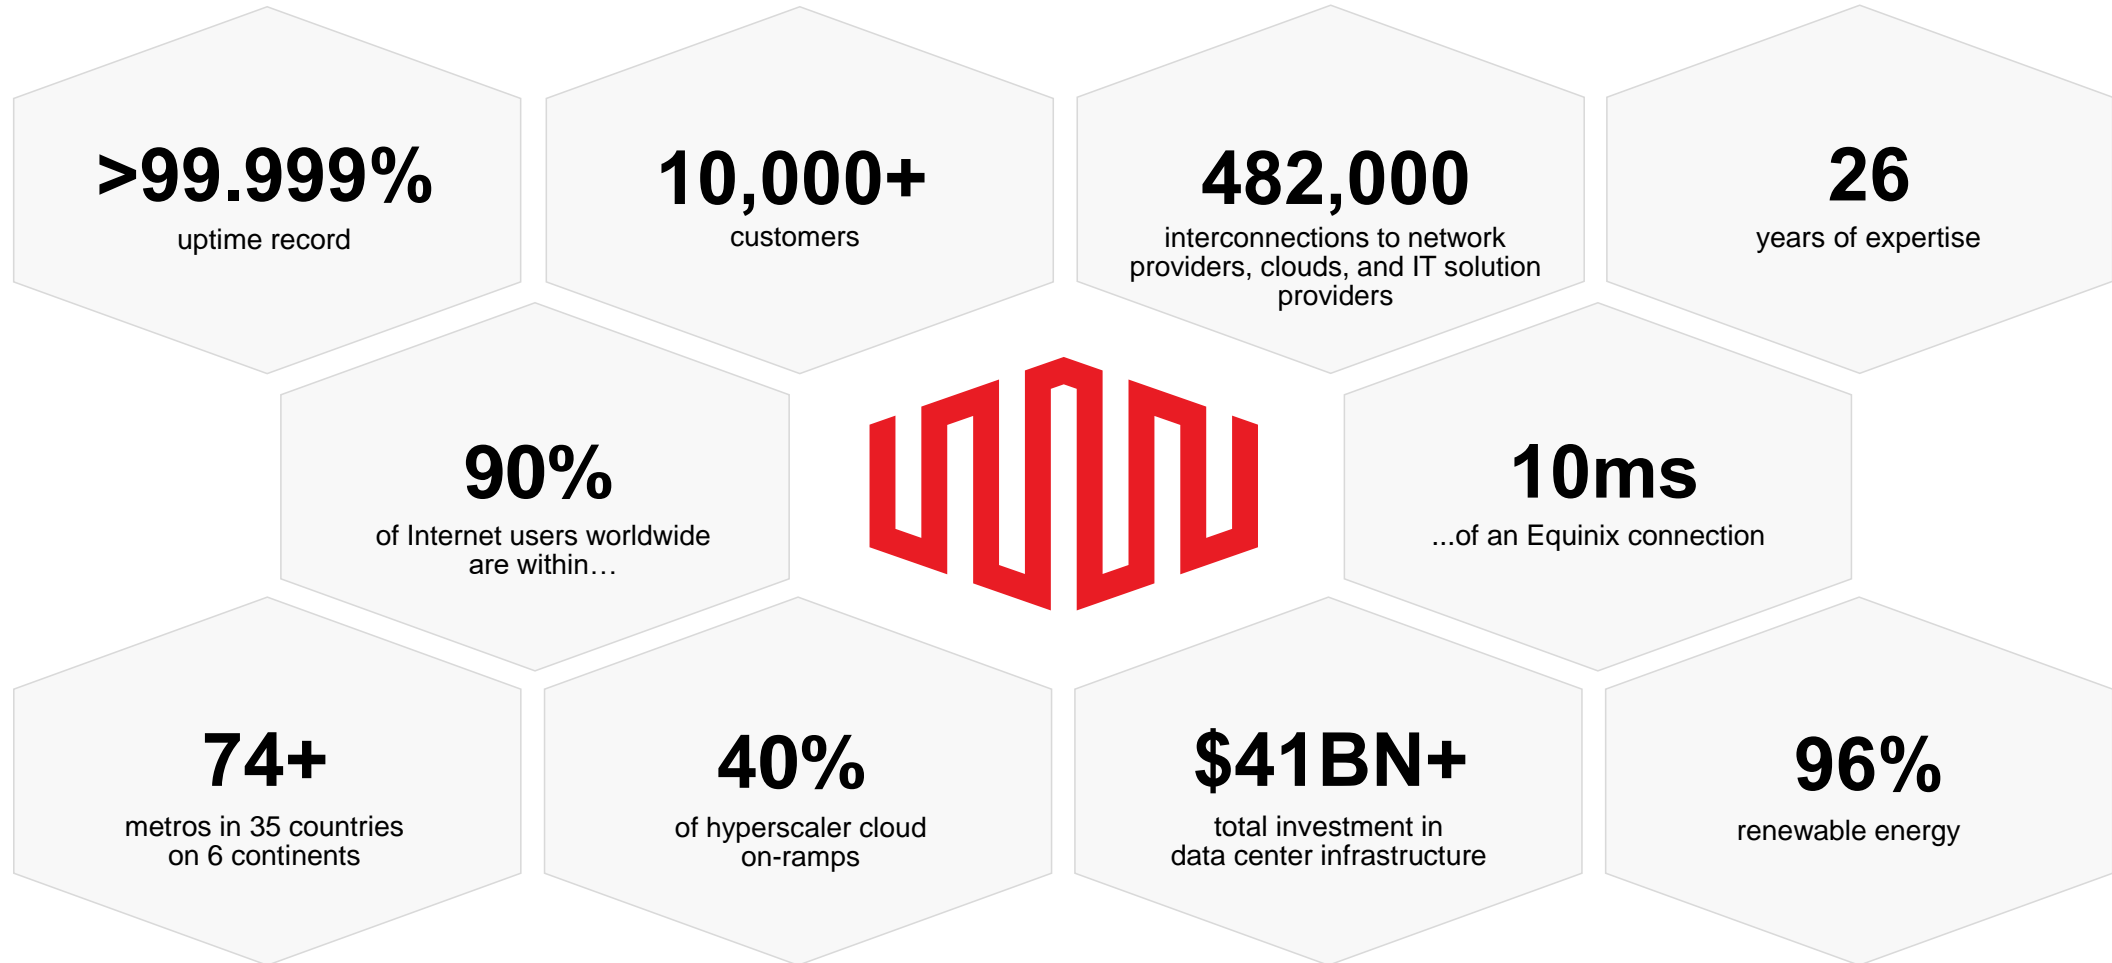

Aggregate data sources closest to the Edge for real-time AI applications

Delivered real-time, scalable marketing intelligence by leveraging high-performance multi-location tuning, edge inferencing, and cloud-integrated AI clusters.

What sets us apart
