

GEODE Welcomes New Swedish Member Trelleborgs Energi

GEODE is pleased to welcome [Trelleborgs Energi](#), our new member from Sweden. Based in Sweden's southernmost municipality, Trelleborgs Energi is a **local energy company** committed to driving the transition towards a safe and fossil-free energy system in Trelleborg. The **company's activities** cover several key areas of the local energy system, including the **distribution of fossil-free district heating**, the **sale of renewable and fossil-free electricity**, and the **development of charging infrastructure and hydrogen solutions**. Through its subsidiary **Trelleborgs Elnät**, the company also focuses on maintaining and developing a reliable and secure **electricity distribution network**.

At the heart of Trelleborgs Energi's work is a strong focus on **customer care**. For the second year in a row, the company was awarded **first place** in the [2026 Brilliant Awards](#) for **Sweden's best customer service** in the **energy industry**. The awards are based on data collected by the research company Brilliant Future, which analyses more than **three million customer surveys** across over **50 countries**. As the results rely entirely on customers' feedback rather than subjective assessments, the award highlights the high level of trust and satisfaction among Trelleborgs Energi's customers. In **2025**, the company's customer service team was recognised with both the **"Newcomer of the Year" award** and **"Best Customer Service in the Energy Industry"**.

GEODE warmly welcomes Trelleborgs Energi to the association and looks forward to working together to support Europe's energy transition.
